

DELICATE TEXTILE WALLCOVERINGS CARE RECOMMENDATIONS

Textile wallcoverings

We recommend carrying out regular, non-aggressive dry cleaning of textile wallcoverings from accumulated dust. Periodic maintenance of them consists in careful cleaning with a dry rag or soft brush as needed.

If a stain appears, you need to remove it as soon as possible by absorbing it with a damp sponge dipped in clean water. Dry with absorbent paper or a white cloth, in no case rub the surface.

Washing textile wallpaper is strongly discouraged.

If you purchased SUPREME coverings using the moisture-repellent impregnation service, wet cleaning is possible using a cloth or soft brush without strong friction is possible.
